PDF Assignment Marker

QUICK USER GUIDE

Install | Open PDFs | Mark | Save | Uninstall

VERSION 11.0.0

Two documents in one workspace

Display a marking rubric and a student assignment side by side. Review, annotate and save each PDF using familiar tools.

Built for teachers and lecturers

Works offline. Supports English and Dhivehi. Includes an installer and a portable version.

PUBLIC DOWNLOAD

github.com/jameel-education/PDF-Assignment-Marker

Windows 11 (64-bit) tested | Windows 10 (64-bit) not yet tested

01 Download and install

Choose the version you prefer

WINDOWS INSTALLER

Download PDF_Assignment_Marker_v11.0.0_Windows_Setup.exe from the GitHub release page. Double-click the file and follow the setup prompts.

PORTABLE EDITION

Download PDF_Assignment_Marker_v11.0.0_Windows_Portable.zip. Extract the ZIP to a folder and run the application from the extracted files. No setup is required.

Installer: four simple actions

1. **Open the release page**

   Visit the project GitHub page, open Releases and choose v11.0.0.

2. **Download the setup file**

   Under Assets, select the Windows Setup .exe file.

3. **Install the application**

   Open the downloaded setup file and follow the installation wizard. The installer uses the current Windows user profile.

4. **Start PDF Assignment Marker**

   Launch it from your Start menu or the shortcut created by setup.

Safety tip: download only from the official release page. If Windows shows a security warning, verify the file source and publisher information before proceeding.

02 Get to know the workspace

The top ribbon controls the active PDF. The right-side tools let you annotate and mark it. The left Pages panel displays page thumbnails when enabled.

Main ribbon

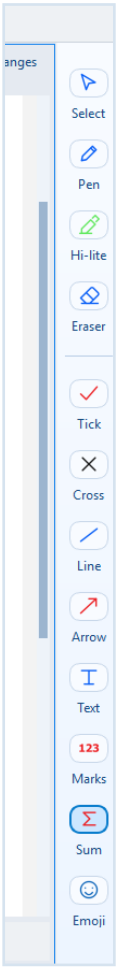

Common actions

Open / Close - select or close a PDF. Save / Save As - keep your work.

Undo / Redo - reverse or restore changes. Rotate / Zoom - adjust the view.

Single View / Split View - work with one document or two documents.

Marking tools

Select: choose or move an existing item.

Pen / Hi-lite: draw or highlight text.

Eraser: remove annotations.

Tick / Cross / Line / Arrow: add common marking symbols.

Text: type feedback in English or Dhivehi.

Marks / Sum: add part marks and calculate a total.

Emoji: place a symbol on the page.

03 Mark a student answer

A simple marking workflow

1. **Open a student PDF**

   Click Open and choose the student assignment.

2. **Choose a marking tool**

   Select Hi-lite for strong statements, Tick or Cross for correctness, and Text for written feedback.

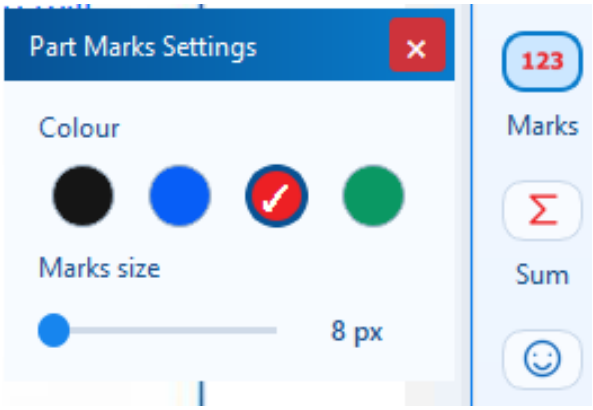

3. **Add individual marks**

   Click Marks, adjust its colour and size if needed, then place part marks beside answers.

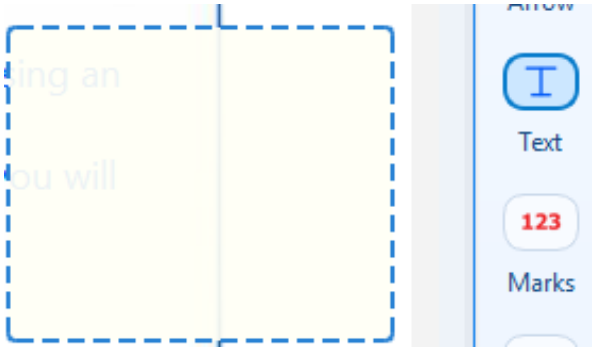

4. **Add the total**

   Use Sum to place the calculated total after entering part marks.

Mark settings and comment entry

Choose a marks colour and a readable size.

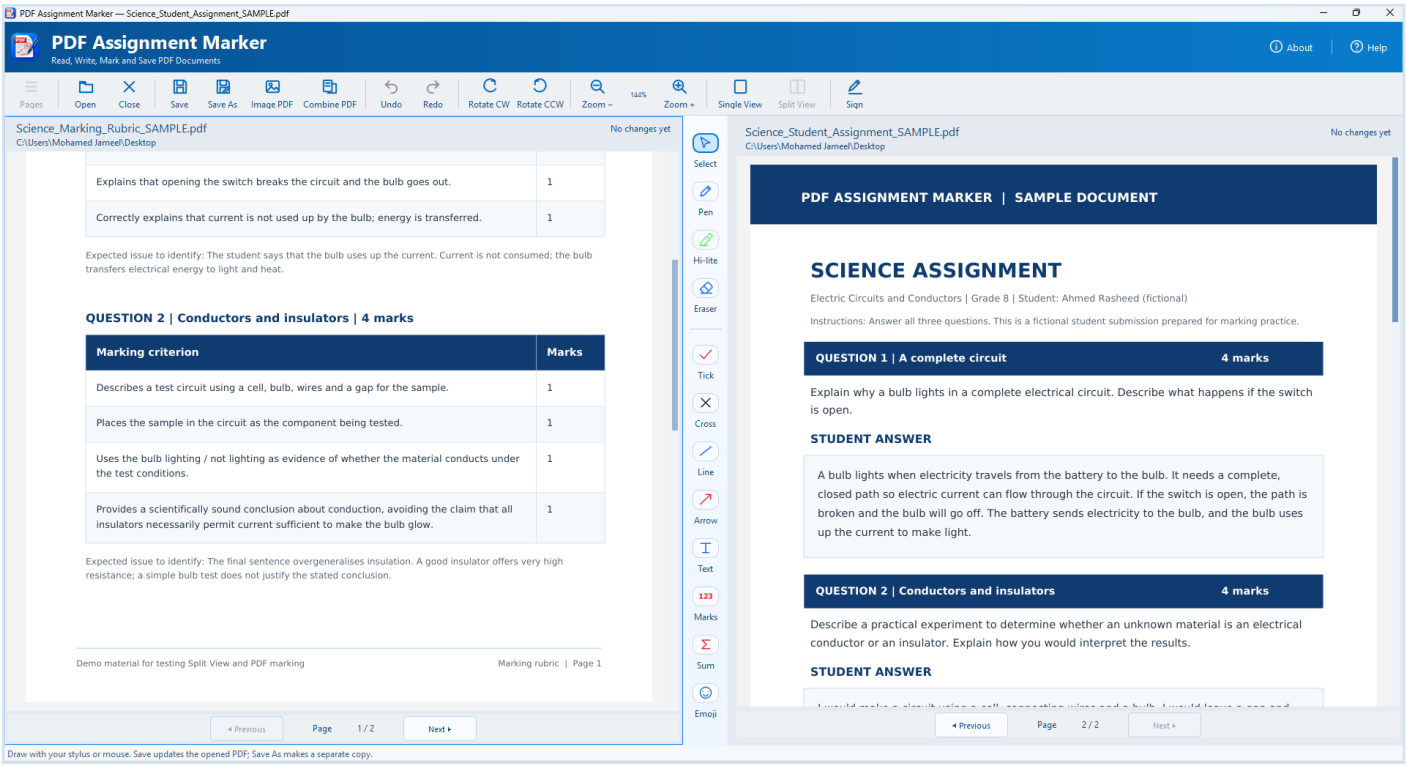

Click Text to enter a comment box.

Useful habit: save a separate marked copy with Save As so you can preserve the original student submission.

04 Use Split View for rubric-based marking

Split View lets you keep the marking scheme visible while assessing a student assignment. Each PDF has its own page position, zoom and saved changes.

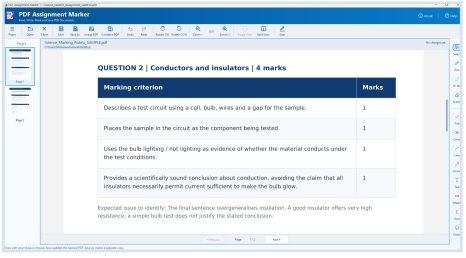

Example: marking rubric on the left, student assignment on the right

How to use Split View

1. Open the first PDF and select Split View. 2. Open the second PDF in the other document window. 3. Click the PDF you want to work on; the blue outline shows the active document.

A second screenshot: the rubric in a larger single-document view

Use the page thumbnails, zoom controls and independent scrolling to locate the question and its matching rubric criterion.

05 Save, export and finish marking

Save each document with confidence

1. **Save**

   Save changes to the active document. A save-status message appears in its header.

2. **Save As**

   Create a separately named PDF, for example: Student_Assignment_Marked.pdf.

3. **Image PDF**

   Export a flattened PDF when you need annotations incorporated into the page image.

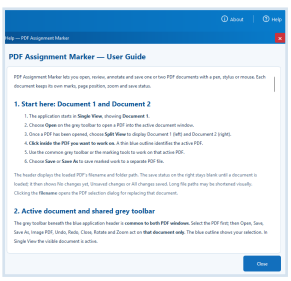

4. **Combine PDF**

   With two PDFs open, the Combine PDF option lets you create a combined document, where supported by the app workflow.

Before you close a document

Check the save-status label in the document header. If you see Unsaved changes, use Save or Save As first. In Split View, check each document separately.

Need help while using the app?

About and Help

Click Help in the top-right corner for the in-app guide. Click About to view the software version and project information.

06 Uninstall and support

Remove the installed Windows application

1. **Open Windows Settings**

   From the Start menu, open Settings.

2. **Find installed apps**

   Go to Apps > Installed apps (Windows 11) or Apps > Apps & features (Windows 10).

3. **Select PDF Assignment Marker**

   Find PDF Assignment Marker in the application list and choose Uninstall.

4. **Complete the wizard**

   Follow the on-screen instructions. Close PDF Assignment Marker first if Windows says it is running.

Using the portable edition?

Close the application, then delete the extracted portable folder when you no longer need it. Keep any marked PDFs you saved elsewhere.
